Get Better.

PD's Perch is an infusion and outpatient diagnostic testing center for patients 0-17. The Perch has a private waiting area with trained nurses who can prepare your child for any of the following procedures:

- Lab tests
- Foley catheters
- IV fluids
- Blood administration
- Antibiotic infusions
- Diagnostic X-rays
- CTs and MRI testing with and without anesthesia
- Ultrasounds
- EKG
- Fluoroscopy

**You and your pediatrician and/or health care provider may also elect to have the following pediatric surgeries:**

- Ear, nose, and throat
- Orthopedic
- Plastic
- Gynecological
- Ophthalmology
- General surgery
- Gastroenterology

**Pediatric Intensive Care Unit (PICU) helps ensure children, who need the most-advanced, critical care, receive services essential to their recovery. Patients are admitted to the PICU for a wide variety of conditions that require specialized monitoring and more critical treatments. Families can expect:**

- Extensively trained critical-care nurses, respiratory therapists, physician intensivists and pediatric sub specialist consults
- Technologically advanced unit with smart equipment linked to electronic health records
- A family-centered care approach, allowing parents/caregivers the ability to stay continuously with a child.
- Pediatric critical care intensivists who provide 24/7 coverage

### **Subspecialty Services**

- Gastroenterology  
Baptist Medical Group Pediatric Gastroenterology and Surgery
- General surgery  
Baptist Medical Group Pediatric Gastroenterology and Surgery
- Urology  
Baptist Medical Group - Pediatric Urology with physician services provided by Monroe Carell Jr. Children's Hospital at Vanderbilt

(Located at 80 Humphreys Blvd • Suite 201 • Memphis, TN 38120)
